

Cederbos Lemon

The Citrusy Zesty Cederbos Lemon Rooibos Tea is a refreshing and cleansing drink, to be enjoyed hot or cold, any time of the day and at any age.

This flavoured Lemon Cederbos rooibos tea is rich in antioxidants, which have anti-aging properties and may play a role in preventing heart disease and cancer. Naturally caffeine-free and free of artificial additives and sweeteners, the Cederbos Rooibos teas can be enjoyed at any time of the day by adults and children. Enjoy this zesty sugar-free tea hot or iced, and savour the marriage of flavours.

The company Cederbos was founded by Corné van der Westhuizen, following the footprints of his dad, Dr Frans van der Westhuizen, who owns the first certified organic rooibos tea farm in South Africa. Working in the rooibos fields and at the processing facility with his dad, Corné learns from a young age that during the natural fermentation process the bees are attracted to the rooibos leaves that are rich in colour and aroma. The bee became the emblem of Cederbos to symbolise our work ethics based on sustainability and respect of nature. Cederbos strives to select the highest quality rooibos leaves for its rooibos tea blends and the Cederbos team follows the guidance of the bees when harvesting the rooibos leaves for packaging.

Our tea bags are biodegradable, unbleached and plastic-free.

In our effort to preserve our environment, for every tree that is cut down to produce our tea boxes a tree is planted in replacement.

Ingredients: Pure Rooibos leaves (*Aspalathus linearis*) and natural Lemon flavouring extract

Health Benefits: caffeine-free, sugar-free, rich in antioxidants, anti-inflammatory properties, and anti-aging properties.
